

Technical Skills

Web Development:	JavaScript, Express, React, Node.js, HTML5, CSS3, Tailwind CSS
Database:	MongoDB (In Progress), SQL, ERDs, Oracle, Data Fetching
Methodologies:	SDLC, Agile/Scrum, Debug & Testing, Object-Oriented Design
Tools Proficiency:	Git, GitHub, Jira/Kanban, MS Office, Visual Studio, VS Code, Unity
Programming Languages:	C++, C#, C

Education

Computer Programming & Analysis Advanced Diploma

Sep 2025 – present

4.0 GPA – Seneca Polytechnic, Toronto, ON

Relevant courses:

WEB322/222 (JavaScript, Express, Node.js, REST API, HTML5, Tailwind CSS, MongoDB)

OOP345 (C++, OOP, Standard Template Library)

Musical Theatre Performance Advanced Diploma

Sep 2021 – Apr 2024

3.9 GPA – St. Lawrence College (SLC), Brockville, ON

Projects

CodeXperts Official Website – Members Page (codexperts.ca)

- Stack: JavaScript, React.js, Next.js, Tailwind CSS, Supabase
- Collaborated with team of 7 to build the Members page frontend
- Engineered React components with dynamic rendering based on filter logic
- Self-taught React and Tailwind to build and style components, writing cleaner code
- Connected the page to Supabase backend with data fetching for up-to-date information

Leapy Frog (judz-n.github.io/play-leapy-frog)

- Environment: Unity, C#, Inkscape, GitHub Pages
- Built a single-scene 2D game in 3 days with physics, collision detection, and object spawning
- Transferred existing C++ knowledge to learn C# and adapt to Unity's scripting language
- Focused on quality of gameplay and refined logic to ensure the best user experience

Visual Novel with Branching Stories – Husky Hack 2026

- Environment: Ren'Py 8.5.2, Python
- Developed and shipped a working game in 9 hours, navigating new tools and engine
- Authored story design using a flow-chart model, mapping 5 distinct narrative outcomes
- Collaborative storyboarding using Excalidraw

Music From Da Heart – Hack the 6ix 2026

- Tech: Node.js, WebSockets, React, Vite
- Developed a working app in 24 hours in collaboration with 3 teammates
- Built and integrated core audio engine in 11 hours using a Node.js WebSocket server
- Designed a heart-rate BPM classifier mapping live biometric data to 4 mood zones
- Mapped iPad pencil pressure, velocity, and tilt into real-time melodic and timbral changes

Meal Ordering Application

- Designed, developed, tested, and debugged a C++ application in 1 month
- Applied OOP principles to design 5 functional modules integrated through a user interface
- Resolved code issues within 5-30 minutes with great efficiency

Experience

CodeXperts

May 2026 – present

Treasurer Toronto, ON

- Serve as first point of contact with vendors, negotiating to secure affordable pricing
- Co-facilitate weekly coding sessions alongside President and Vice President
- Manage club funds and secure spending approvals, keeping purchases within budget
- Manage club's Instagram account to promote events and drive member engagement
- Contributed to club's official website development team, balancing with tasks at school

SLC Original Production

Sep 2023 – March 2024

Co-head of Set & Props/ Light Design/ Tech Producer/ Actor Brockville, ON

- Acted as main point of contact between cross-functional teams (creatives, tech and venue)
- Collaborated closely with co-head to design, make, and acquire props
- Oversaw and participated in construction of the set over a 2-month period
- Transformed director's vision for set and technical needs into actionable requirements
- Fulfilled multiple responsibilities required to produce and perform in the show

Super Sonics Production

May 2025 – present

Voice Actor (Title TBA) Toronto, ON

- Learned new dubbing skills on the job in under 1 hour
- Efficiently recorded 3-6 episodes every 4-hour session
- Received and implemented director's feedback on the spot, adapting to different approaches
- Understood the target audience and tailored my performance to cater to children

Spin Master

Mar – May 2025

Voice Actor (Sparkles Magical Market) Toronto, ON

- Efficiently recorded 3-6 episodes every 4-hour session
- Worked closely with production to give a performance closest to the vision
- Improvised add-on lines, adding extra charm to my character

Awards

CodeXperts Coding Competition (Seneca Polytechnic) – 2nd place, Beginner's Division

- Solved a Blackjack game algorithm in 2 hours using C++ and Object-Oriented concepts

Interests

Video games, puzzles, exploring cafés, and rock climbing
